# CONTENTS

VOLUME I 1936

---

## LIGHTSOURCES

	page		page
Comparison between discharge phenomena in sodium and mercury vapour lamps . . . . .	2, 70	The photometry of metal vapour lamps . . . . .	120
Brightness greater than on the sun . . . . .	62	The mercury vapour lamp HP 300 . . . . .	129
High-frequency oscillations in sodium lamps . . . . .	87	A new apparatus for testing the fastness-to-light of materials . . . . .	277
The development of the coiled-coil lamp . . . . .	97	The "Photoflux", a light-source for flashlight photography . . . . .	289

## LIGHT AND ILLUMINATION

Characteristics of the eye with special reference to road lighting . . . . .	102	Visual acuity and speed of vision in road lighting . . . . .	215
The definitions of brightness and apparent brightness and their importance in road lighting and photometry . . . . .	142	The problem of glare in highway lighting . . . . .	225
The perception of brightness contrasts in road lighting . . . . .	166	Sodium lighting of tennis courts . . . . .	252
Irradiation of plants with Neon light . . . . .	193	The perception of colour . . . . .	283
		How can one judge the efficiency of road lighting . . . . .	349

## RADIO AND TELEVISION

An experimental television transmitter and receiver . . . . .	16	Some characteristics of receiving valves in short-wave reception . . . . .	171
Relaxation oscillations . . . . .	39	Electrical filters . . . . .	240, 270, 298, 327 363
Demonstration model illustrating superheterodyne reception . . . . .	76	The communal aerial . . . . .	246
The VR 18 transmitting and receiving equipment . . . . .	114	Improvements in radio receivers . . . . .	264
		Television . . . . .	321
		Gas-filled triodes . . . . .	367

## SOUND, RECORDING AND REPRODUCTION

The loudspeaker and sound-amplifying installation on the T.S.S. "Normandie" . . . . .	22	The Philips-Miller system of sound recording . . . . .	107
Optical model experiments for studying the acoustics of theatres . . . . .	46	The sound recorder of the Philips-Miller system . . . . .	135
Absolute sound-pressure measurements . . . . .	82	The sound-recording cutter in the Philips-Miller system . . . . .	211
		The recording strip in the Philips-Miller system . . . . .	231

## TELEPHONY

Optical telephony . . . . .	152	Rectifiers for telephone exchanges . . . . .	295
Electrical filters . . . . .	240, 270, 298, 327, 363	The use of loading coils in telephony . . . . .	353

## X-RAYS

	page		page
A modern high-voltage equipment . . . . .	6	Dosage control in X-ray Laboratories and Works . . . . .	62
Practical applications of X-rays for the examination of materials 29, 60, 95, 158, 188, 220, 253, 373		Systematic X-ray examination for the detection of pulmonary tuberculosis . . . . .	335

## CATHODE RAYS

The production of sharp fluorescent spots in cathode ray tubes . . . . .	33	An oscillograph apparatus . . . . .	147
Control of the beam intensity in cathode ray tubes . . . . .	91	The electron-microscope as an aid in research	312
		Electron-optical X-ray observations on the transition of Alpha to Gamma iron . . . . .	317

## ELECTROTECHNICAL APPARATUS

A modern high-voltage equipment . . . . .	6	Heavy-current condensers . . . . .	178
Relay valves as timing devices in seam-welding practice . . . . .	11	Automatic starting resistances . . . . .	205
A high-frequency furnace with valve generator	53	An impulse-voltage generator for two million volts . . . . .	236
A new metal rectifying valve with mercury cathode . . . . .	65	Rectifiers for telephone exchanges . . . . .	295
An oscillograph apparatus . . . . .	147	A surveillance system using infra-red rays . . . . .	306
A controllable rectifier unit for 20 000 volts/18 amperes . . . . .	161	The Philips twin current welding unit . . . . .	338

## MATERIALS AND THEIR RESEARCH

How does a welding electrode fuse? . . . . .	26	Properties and applications of artificial resin products . . . . .	257
Practical applications of X-rays for the examination of materials 29, 60, 95, 158, 188, 220, 253, 373		A new apparatus for testing the fastness-to-light of materials . . . . .	277
A speed-increment test as a short-time testing method for estimating the machinability of steels . . . . .	183, 200	The electron-microscope as an aid in research	312
An impulse-voltage generator for two million volts . . . . .	236	Electron-optical X-ray observations on the transition of Alpha to Gamma iron . . . . .	317
		Telescope mirrors . . . . .	358
		The damping of mechanical vibrations . . . . .	370

## MISCELLANEOUS

Introduction . . . . .	1	A new apparatus for testing the fastness-to-light of materials . . . . .	277
Abstracts of publications 32, 63, 96, 127, 160, 190, 223, 255, 288, 346, 376		A surveillance system using infra-red rays . . . . .	306
High-frequency oscillations in sodium lamps	87	Telescope mirrors . . . . .	358
A very sensitive spring balance . . . . .	126	The damping of mechanical vibrations . . . . .	370
Irradiation of plants with Neon light . . . . .	193
